

To our residents,

Clay County has requested that we share an update with you that they will start their 3A Project on Russell Road on Feb 12th, 2024. One element of the project is the building of a turn lane on Russell at Oak Stream. For this reason, Clay County will shut down the entrance/exit onto Russell Road for app. 3 months. They will be doing work at that intersection to include a crosswalk to a new sidewalk. During this closure, Oak Stream will be gated but will have emergency access for fire rescue. They have also shared that lighted signboards are now in place. This is not a CDD project. We will continue to share any additional updates that we receive regarding this Clay County 3A project.
